

Streaming of printed books

**P2P marketplace,
replacing Amazon**

How it works

1

One user takes a single picture of a bookshelf

2

The app recognizes books and keeps it in global catalogue with geo-location

3

Another user takes books from a neighbour instead of buying on Amazon

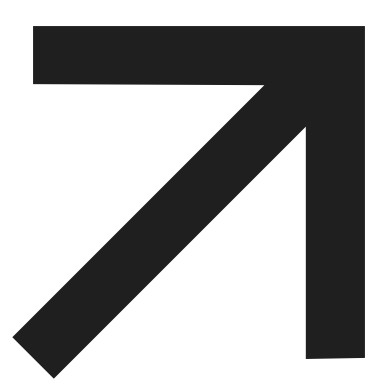

Market size

Global market of printed books is

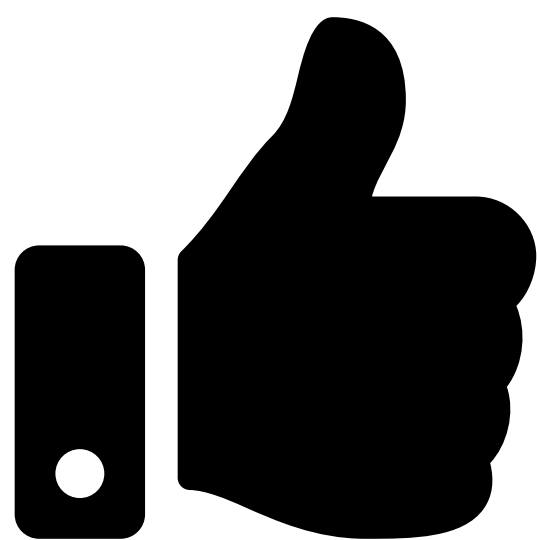

More than

**100
billion
dollars**

**Competitive
advantage**

**Mimic Amazon
but 10 times cheaper**

Copycat protection

Network effects

Loss of income and books
which are with other users

Scale effects

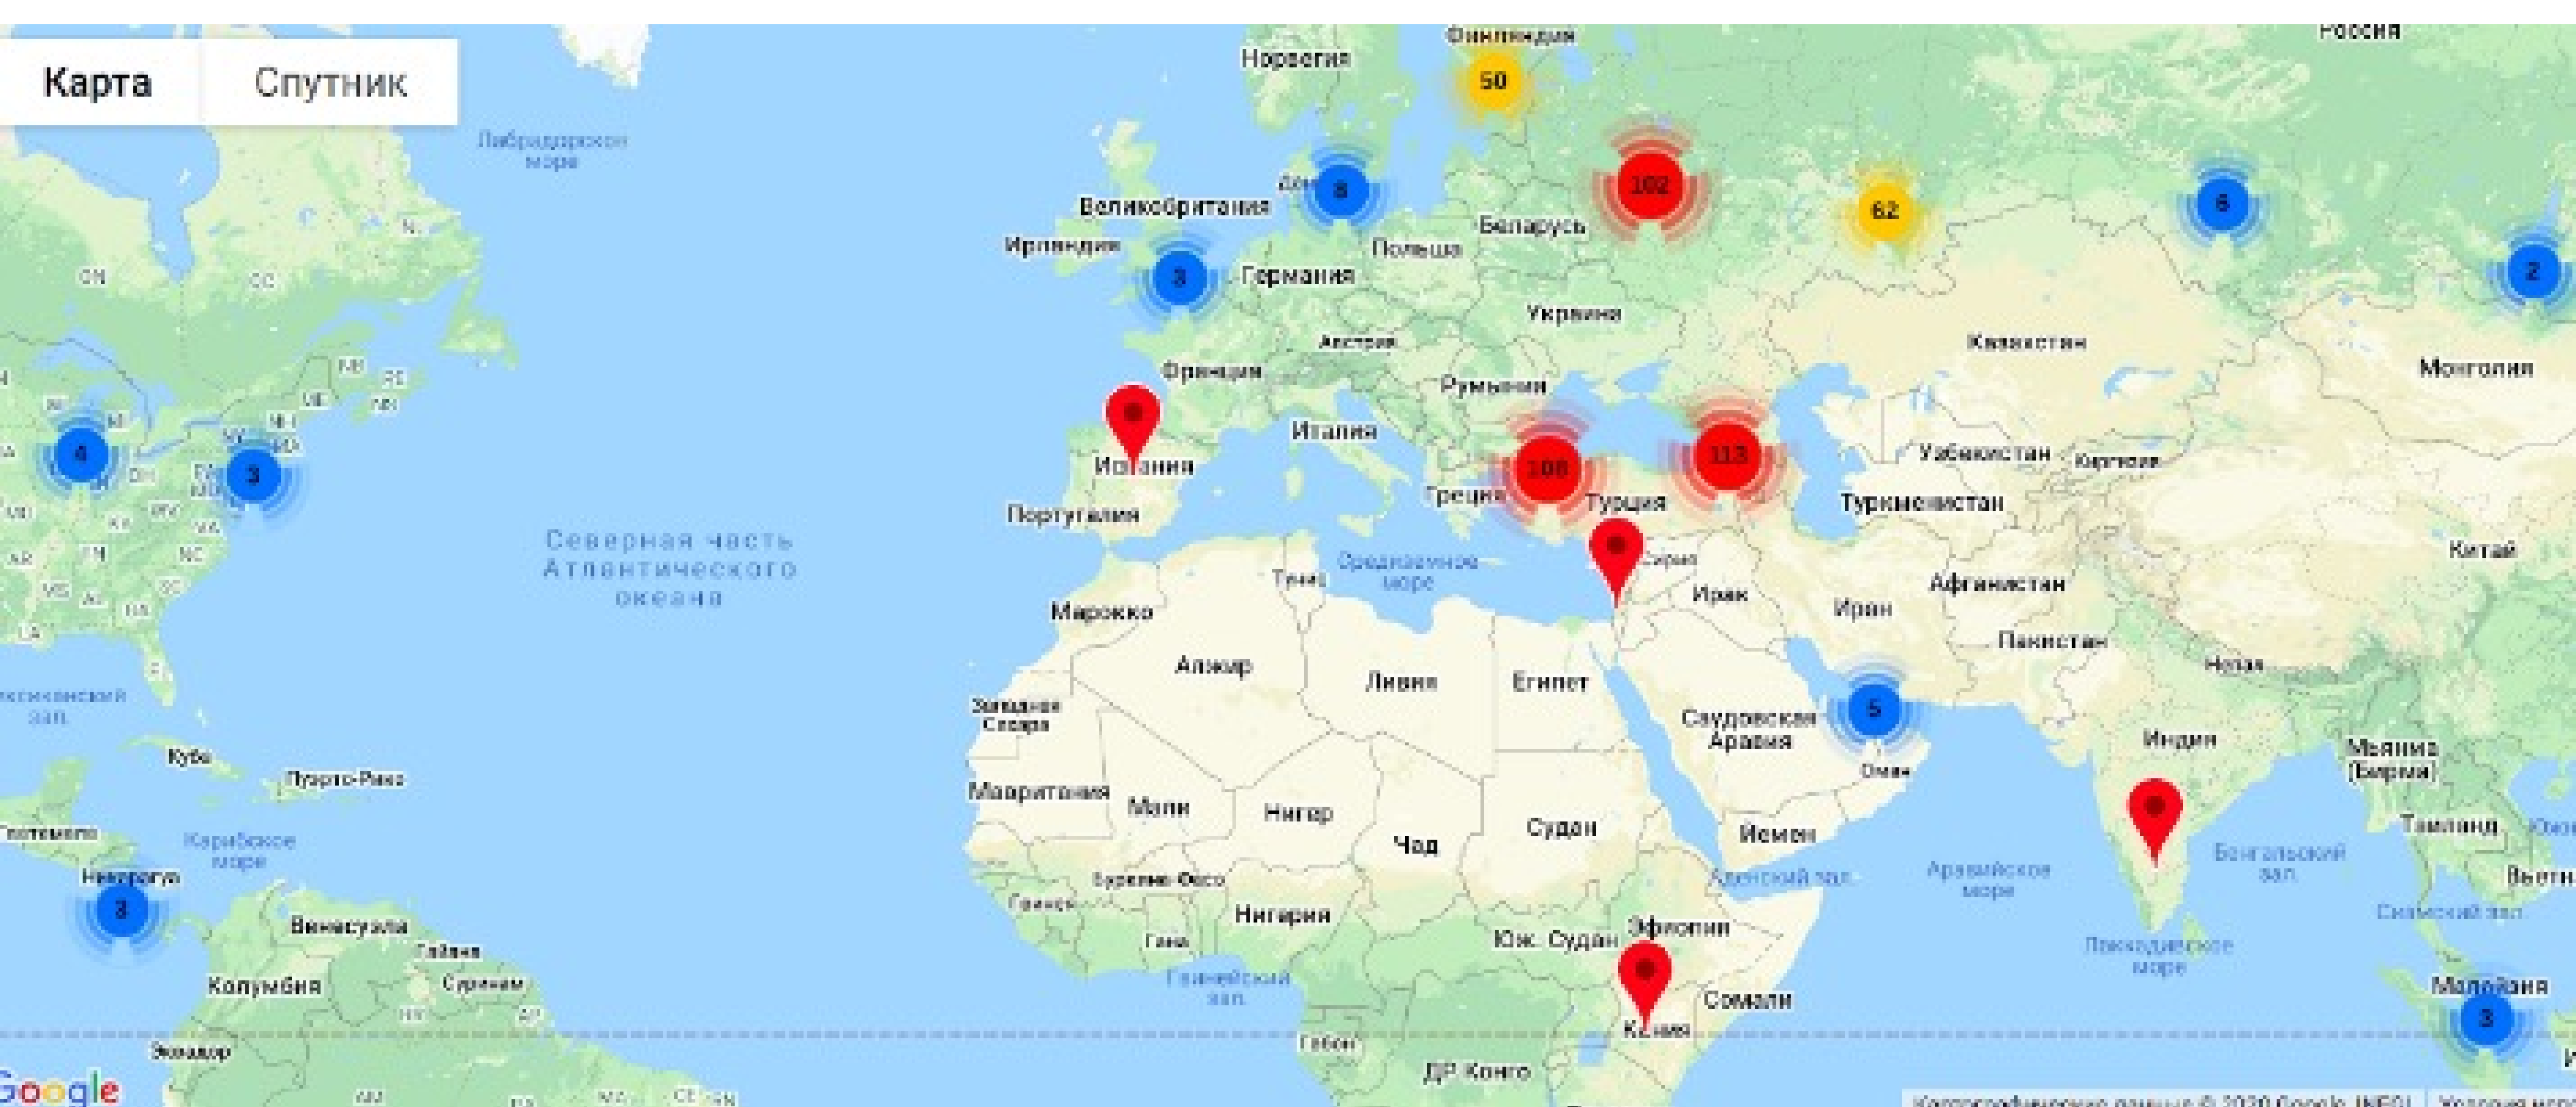

Number of books available
and coverage

Project achievements

Oct 2019 - prototype ready

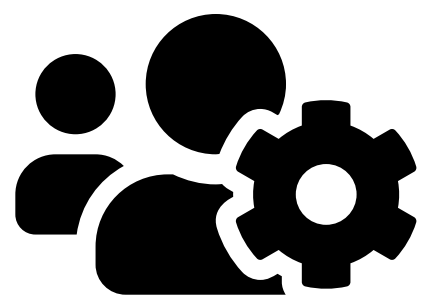

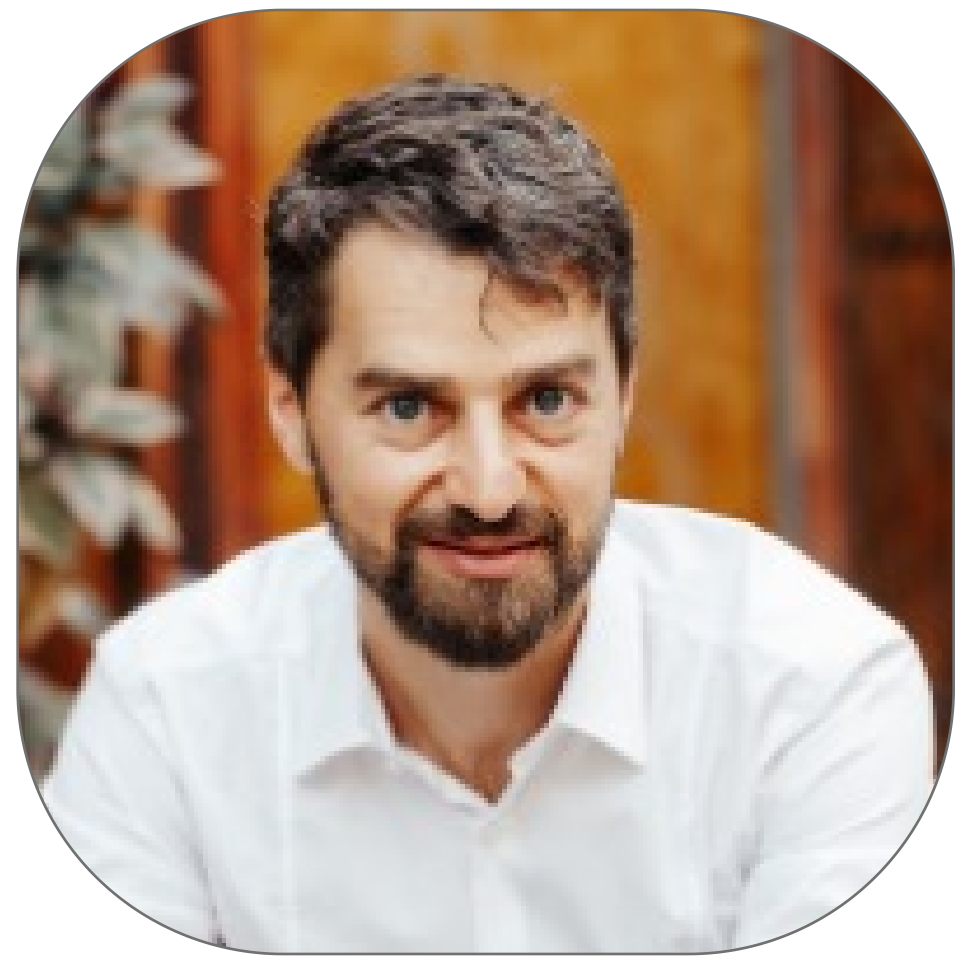

Nov 2019 - 430 early users

May 2020 - release of MVP

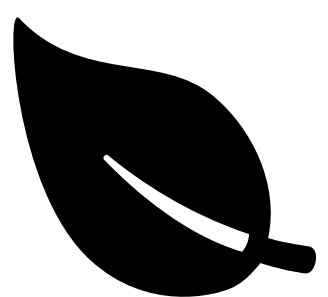

Current geography

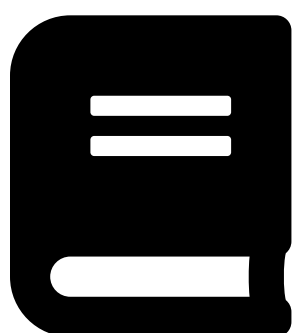

Founder
